MS Office

Workplace Skills

++ Problem solving skills
Experienced with Mac and PC
Strong customer service skills
Detail-oriented (I love the details!)
Able to organize tasks by urgency
Get along great with others

Designer with a background in many areas including surface design, graphic design, and 3D design

Experience

Since 2008, I have created numerous fabric & wallpaper designs, jewelry, and other 3D printed products for my own business, Medúzy.

Surface Design

2008-present

I've significantly honed my illustrator and photoshop skills since college thanks to fabric design. I've created repeatable patterns and textures in many styles using various techniques, while keeping an eye on current color and style trends.

3D Design

2015-present

I created my own line of unique jewelry designs using several 3D design programs. I also learned about 3D printing to manufacture the pieces. I included some examples of my process in my online portfolio above.

Other/miscellaneous

- Created a collection of papercut lights using my vector skills and a vinyl cutter. Used my 3D design knowledge to manufacture functional parts.
- Designed the logo and sign for Eden Garden & Pets
- Created branding and package design for my online store
- Handled all web design for my online shop

Places I've Worked

Oral & Maxillofacial Surgery Associates 2007-2018

Insurance Dept/Accounts Receivable

- Handled coding, billing, and payments
- Disputed errors with insurance companies
- Worked hard to help patients navigate insurance issues

Waukesha State Bank

2004-2007

Teller/Personal banker

- Handled financial transactions
- Customer satisfaction above all else!
